

Your App Name

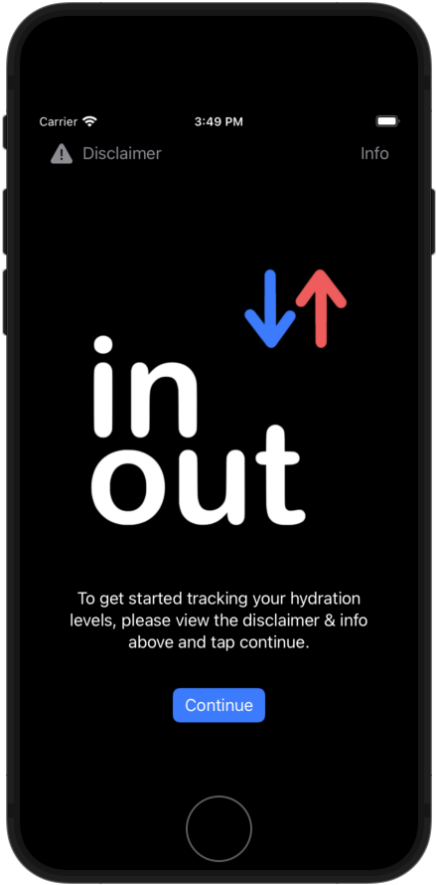

FOA the App Reviewer;

Thank you for taking the time to review my app, **Your App Name**. In this document I have included various screenshots that aim to provide an overview of how this app works should it be required.

The images used in this User Manual are taken on simulators where the light appearance represents an iPhone 13 Mini and the dark appearance represents an iPhone 8.

The purpose of this app is to... **[insert explanation of what your app does here]**.

Thanks for viewing,
Your Name.

Welcome Screen

Your App Name

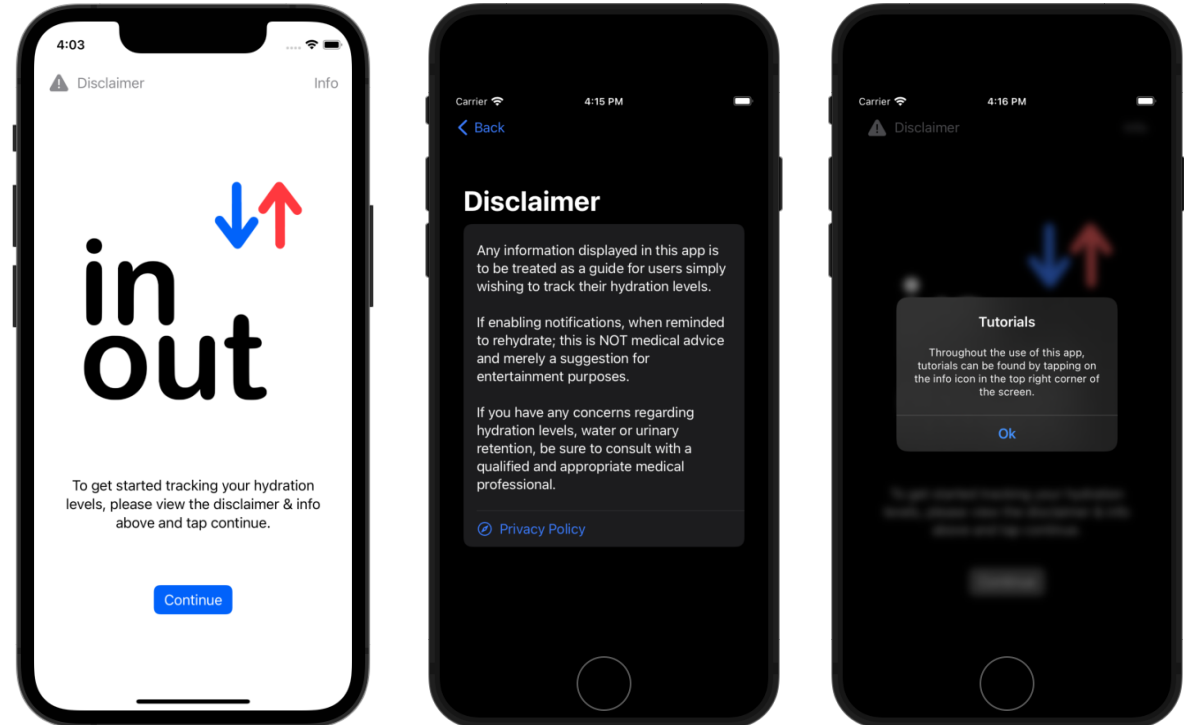

User Manual

Page 2

Upon the users first launch of the app, the user is prompted to review the Disclaimer via the button in the top left. This second view contains a link to the Privacy Policy that will open the Safari App.

The info button on the top right will show highlight to the user that they are able to access “tutorials” whilst using the app and these can be revisited.

The user can then click the “Continue” button to begin the App set up.

Setup Screen

After tapping continue, users are navigated to the Setup Screen where they have the option to add some personal info in the first section. This is **NOT** required by the user.

The user can also toggle between different unit measurements.

A daily water intake target is then calculated for them taking into account their age and weight.

The user has the option to forgo this target type and can alternatively select “Average” or “Custom”.

Home Screen

After confirming their details, the user can click save which will store the data to the users private iCloud using the CoreData framework.

This will take the user to the home screen and display a prompt to allow device authentication and notifications.

Tapping on the top “Summary” card will toggle the summary card between daily and weekly stats.

The info button in the top right of the Home view will show tips.

New Flow Screen

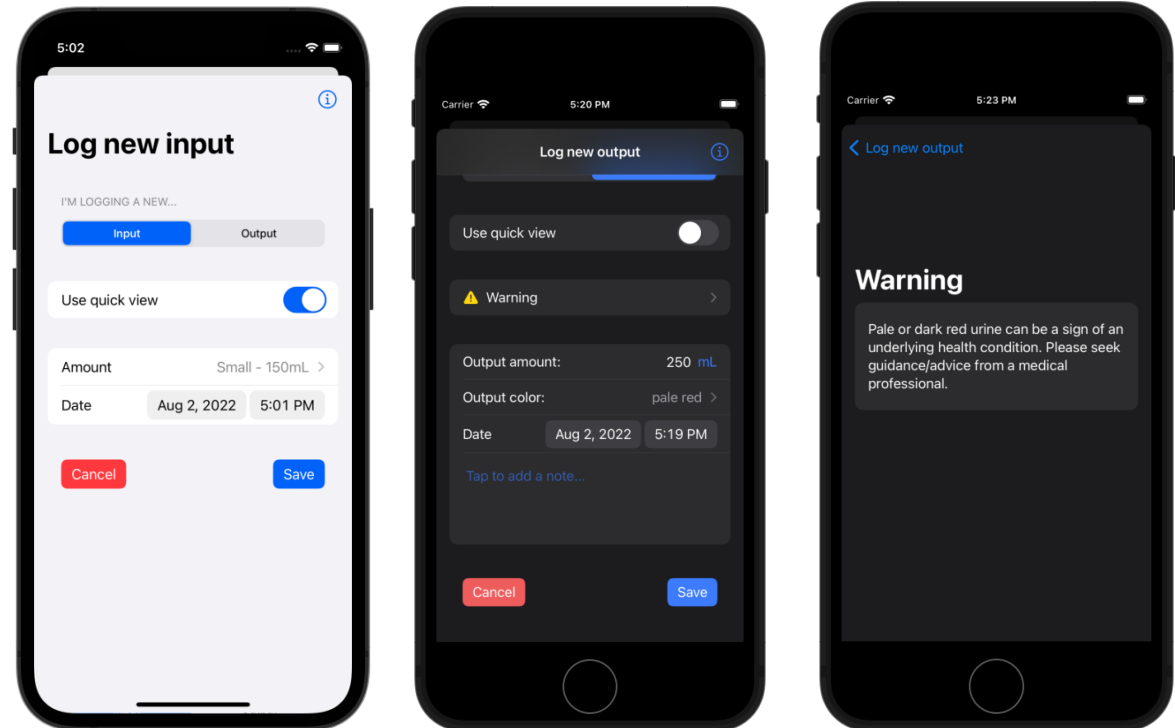

Clicking the middle tab will take the user to the New Flow screen.

From here, the user can toggle between a new input or output flow.

The ability to log the output color will be beneficial to users who require more detail regarding their Flows.

Pale red or dark red output selection will trigger an advisory warning to the user.

The info button in the top right of the New Flow view will show tips.

Editing a Flow

Your App Name

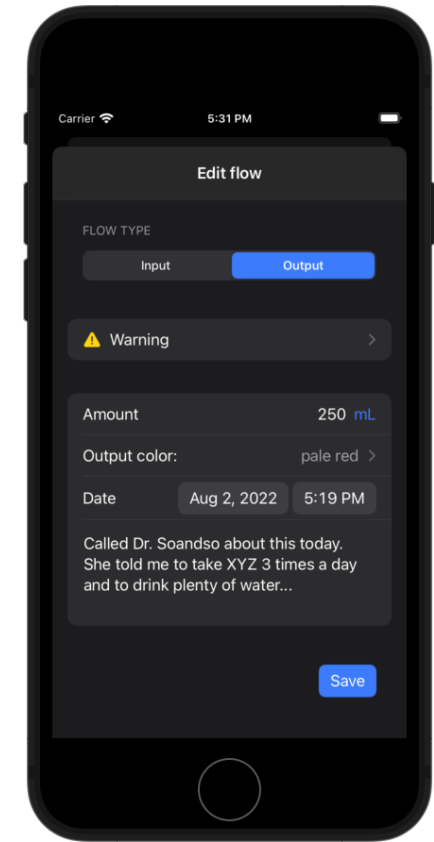

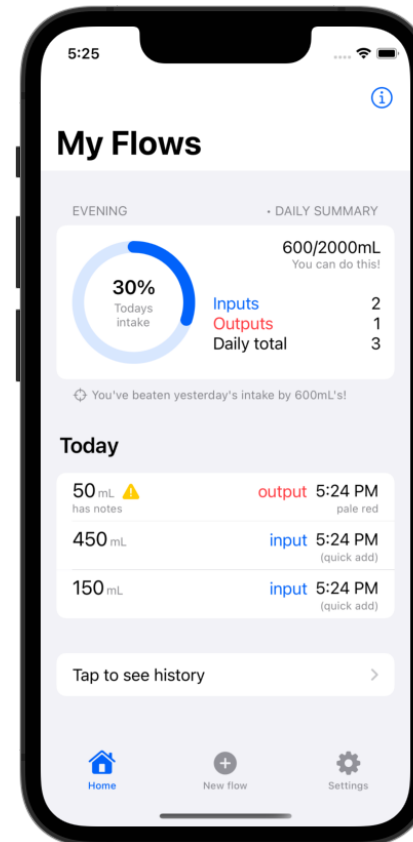

User Manual

Page 6

After saving a flow, it will now be visible from the Home screen.

From here, a user can simply tap on a Flow from the list of Flows which will navigate them to an edit view.

This will allow users to edit the time, amount, color, input/output type and add notes if they didn't when the flow was initially logged.

Deleting a Flow

Swiping from right to left on a Flow will prompt the user to delete a Flow object.

The user is advised at this stage that deleting a Flow is permanent and given a choice to continue.

Swipe to delete functionality is available from within the Home view tab and the History section which can be found at the bottom of the Home view.

History Screen

The history view is broken down firstly by month and then day.

The user can tap on a month which will display the days where Flows were recorded and a brief summary of that days stats.

Clicking on a day will then reveal all the flows for that day so the user can come back to a particular Flow view, edit or delete the Flow.

Settings Screen

The settings view allows the user to edit their details and remove things as they please such as their name if they entered it on set up.

It also allows users to customise their default “New Flow” entry by toggling input/output and quick view.

Users have the option of support via the Mail app by clicking “Contact the developer” and can also visit the website for the app.

The disclaimer and privacy can also be revisited and the user can view tips for the settings at any time using the info button in the top right on the screen.
